

# DPF REFILL FLUID UNIVERSAL

## FOR DOSING SYSTEMS

Product ID: 80057

### Product description

DPF Refill Fluid is a universal replacement for most common soot filter fluids used by various manufacturers in onboard diesel particulate filter (DPF) fluid dosing systems. The DPF fluid reduces the combustion temperature of soot so these particles will combust quickly, completely and regularly at lower temperatures when regenerating the DPF. This results in extended DPF life and trouble-free operation of your DPF system.

### Benefits

- ✓ Ensures trouble-free operation of your DPF-system
- ✓ Enables quick and complete soot combustion and regeneration
- ✓ Prevents DPF clogging
- ✓ Reduces emission of smoke and particulates
- ✓ Extends DPF and catalyst service life
- ✓ Universal alternative to 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup> and 4<sup>th</sup> generation DPF fluids of common OEM's

### Usage

All diesel cars with a refillable onboard dosing system for DPF Regeneration whether equipped with a tank or a reservoir bag requiring 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup> and 4<sup>th</sup> generation DPF fluids (white, green, blue and black ring).

**Important:** For DPF dosing units only. Do not add directly into fuel tank!

### Direction

Professional use only. Follow the instructions for replacement of DPF Fluids provided by the OEM.

### Dosage

One 1 L bottle to be used for refilling of the onboard dosing system reservoir.

### Technical specification

Density g/cm <sup>3</sup> :	0,815
Flash point:	> 61°C
Colour:	Amber
Odour:	Characteristic
